

# Endell Veterinary Group

## - Our Prices -

Endell Veterinary Group is a practice that aims to provide a high standard of care, using the most up to date equipment and facilities available within the constraints of general practice. We have well trained staff who regularly attend meetings to develop and advance the service we offer. We therefore make no attempt to be the lowest priced practice in the area, but charge what we feel is necessary to provide this high level of care.

We are proud of our facilities and if you wish to have a tour around the small animal department, please let one of our team know.

The following is a list of our most commonly used services. We are happy to discuss our fees with our clients and can provide estimates for other procedures and treatments not listed below on request.

## Inoculations:

### Dogs:

- **First Vaccination . . . . . £33.00**  
A complete health check with a veterinary surgeon, discussion of any problems and first inoculation against Distemper, Hepatitis, Parvovirus, Leptospirosis and Kennel Cough. Usually given at eight weeks of age or older. Includes optional six week free pet insurance for dogs under twelve months of age. Qualifies for a free health check at five months of age.
- **Second Vaccination . . . . . £33.00**  
A general health check with a veterinary surgeon and second injection to complete the initial vaccination course. Usually given two weeks after first vaccination.
- **Annual Vaccination . . . . . £35.50**  
A complete health check with a veterinary surgeon and injection to boost the initial vaccination course, giving protection against life-threatening dog diseases (Distemper, Hepatitis, Parvovirus, Leptospirosis and Kennel Cough). It provides an excellent opportunity to discuss any concerns about your dog's health.
- **Kennel Cough Vaccination Only . . . . . £30.00**  
A general health check with a veterinary surgeon and inoculation against Kennel Cough. Please note that this vaccine is given up the dog's nose.

### Rabbits:

- **Myxomatosis Vaccination . . . . . £23.00**  
A complete health check including a dental examination with a veterinary surgeon and inoculation against Myxomatosis. Usually given at six weeks of age or older and then twice a year. Includes optional six weeks' free pet insurance for rabbits under twelve months of age.
- **VHD Vaccination . . . . . £23.00**  
A complete health check including a dental examination with a veterinary surgeon and inoculation against Viral Haemorrhagic Disease. Usually given two weeks after a Myxomatosis vaccination and then once a year.

### Cats:

- **First Vaccination (Tricat) . . . . . £29.25**  
A complete health check with a veterinary surgeon, discussion of any problems and first inoculation against cat 'flu and enteritis only. Usually given at nine weeks of age or older. Includes optional six weeks' free pet insurance for animals under twelve months of age.
- **Second Vaccination (Tricat) . . . . . £29.25**  
A general health check with a veterinary surgeon and second injection to complete the initial vaccination course against cat flu and enteritis. Usually given three weeks after the first vaccination.
- **First Vaccination (Forcat and FeLV) - recommended option . . . . . £33.00**  
A complete health check with a veterinary surgeon, discussion of any problems and first inoculation against cat flu, enteritis, chlamydiosis and feline leukaemia. Usually given at nine weeks of age or older. Includes optional four weeks' free pet insurance for animals under twelve months of age. Qualifies for a free health check at five months of age.
- **Second Vaccination (Forcat and FeLV) - recommended option . . . . . £33.00**  
A general health check with a veterinary surgeon and second injection to complete the initial vaccination course. Usually given three weeks after the first vaccination.
- **Annual Vaccination . . . . . £35.50**  
A complete health check with a veterinary surgeon and injection to boost the initial vaccination course against cat flu and enteritis (or cat flu, enteritis, chlamydiosis and feline leukaemia). It provides an excellent opportunity to discuss any concerns about your cat's health.

Please note that medications (eg: painkillers and antibiotics), bandages and unforeseen circumstances are not included in the above fees.

---

## Miscellaneous:

### Microchipping:

Permanent identification by injecting a tiny microchip about the size of a grain of rice under your pet's skin. It carries a unique identification number to allow lost or stolen pets to be reunited with their owners. Essential first step in obtaining a Pet Passport.

- **Standard (when given at same time as vaccination, neutering or with more than one pet) . . . . . £10.00\***
- **Biotherm (when given at same time as vaccination, neutering or with more than one pet) . . . . . £15.00\***
- **All other times . . . . . £25.00**

\*Must be a registered client

### Loyalty Cards:

We run a number of loyalty schemes - please ask at reception for details so you don't miss out on discounts and vouchers.

### Pet Healthcare Plans:

Preventative veterinary healthcare where you pay a predictable set amount each month covering your pet's needs that are not covered by insurance. Please ask any member of our small animal team for further information or phone the Pet Healthcare Plan Helpline: 0800 169 9958.

---

## Additional Information:

- All prices include VAT
- We reserve the right to change prices without notice, so please confirm at reception that the prices shown above are current.
- We would like to remind all clients that, unless an equine or farm account is held, payment is due at the time of consultation with the veterinary surgeon. If you have difficulty with payment, then this should be discussed with the veterinary surgeon at the earliest opportunity and preferably before the time of consultation.
